

MAMBA FLAT

MARKER POST

APPLICATION

Two-sided, flexible fiberglass marker provides high visibility to buried utilities. Recessed design on both sides protects vinyl decal from damage during installation or impact. Decal alerts excavators to buried pipes/cables and can be customized with utility brand, 811 logo, and Call Before You Dig logo.

Temperature Tested

- Remains stable -30 F to +120 F; will not embrittle in cold nor soften in heat
- Will survive controlled ditch burns which often melt plastic markers

— Fiberglass content 65% for superior strength

— .435" wall thickness

— .58 lbs/foot

— 3.75" width
